UNITED STATES GOVERNMENT

Memorandum

TO : Director of Logistics

DATE: 14 October 1969

FROM : Chief, Building Planning Staff, OL

SUBJECT: Request for Funds to Accomplish Topographic Plotting of Headquarters and Environs by Army Map Service

1. This memorandum contains a request for funds as enumerated below.

2. During the past several months, members of this Staff have been working with the Office of Basic and Geographic Intelligence (OBGI), DDI, to obtain an accurate, up-to-date, topographic map of the CIA property at Langley and the adjacent Bureau of Public Roads (BPR) property including the Scattergood-Thorne tract.

3. The Real Estate and Construction Division (RECD), OL, has made FY 1969 funds (\$16,900) available to the Public Buildings Service (PBS), Region 3, for "as-built" drawings of existing facilities at Langley Headquarters site, Viner, Rivercomb, and Travers tracts, which would include topography. It is probably not practical or feasible to attempt to redirect a portion of these FY 1969 funds to the Army Map Service (AMS) for the more inclusive topographical mapping.

4. The Army Map Service, which was contacted by OBGI, gave an estimate of \$2,155 to provide the Agency with basic contour information of all CIA property, BPR property, and the Scattergood-Thorne property based on aerial photography. They estimate that 17 working days from "notice to proceed" will be needed to accomplish this work. The Office of Basic and Geographic Intelligence strongly endorses having the AMS to do this plotting.

5. The Staff feels that the use of the AMS would offer the following advantages to the Agency:

a. Elimination of the topographic item contained in the FY 69 work order to General Services Administration for "as-builts" would free approximately \$4,500 for utility layouts and other detailed studies called for in the work order.

SUBJECT: Request for Funds to Accomplish Topographic Plotting of Headquarters and Environs by Army Map Service

b. It would provide data coverage of the BPR and Scattergood-Thorne tracts not available to survey parties under existing limitations.

c. The topographic work would undoubtedly be done more rapidly with acceptable accuracy.

6. It is recommended that FY 1970 funds in the amount of \$2,155 be made available by the Office of Logistics for OBGI to transfer to the AMS for the topographic plotting work. If approved, RECD will amend the "scope of work" given to PBS for the proposed "as-built" contract.
